The purpose of this program is to provide technical assistance and native or adapted plant materials to encourage private landowners and public land management agencies to make conservation plantings for windbreaks, shelter belts, woodlots, erosion control, or food and cover for wildlife. Tree seedlings offered by the Division of Forestry are graded and grown to sizes suitable for conservation plantings on private and public lands. Plants purchased at the Washoe Nursery must be used for conservation purposes as provided for by NRS 528.105.

FALL IS GREAT FOR PLANTING!

Warm soils encourage root growth before the ground freezes, allowing for earlier, more vigorous root and top growth in the spring. Fall plantings, with an already established root system, will be more tolerant of the summer heat than those planted in the spring. Take advantage of this time to come visit the Washoe Nursery before we close for the winter!

HOURS

- Open to the public May 14th – Oct 10th, Thursday through Saturday, 8:30 a.m. to 3:00 p.m.
- Closed all state and federal holidays.
- The nursery will re-open in May of 2010.
